

EVALUATION UPDATE

Baseline Indicators and Progress
toward Measurable Outcomes

Kristin Haegele Hill, MS
DOH Evaluation Consultant

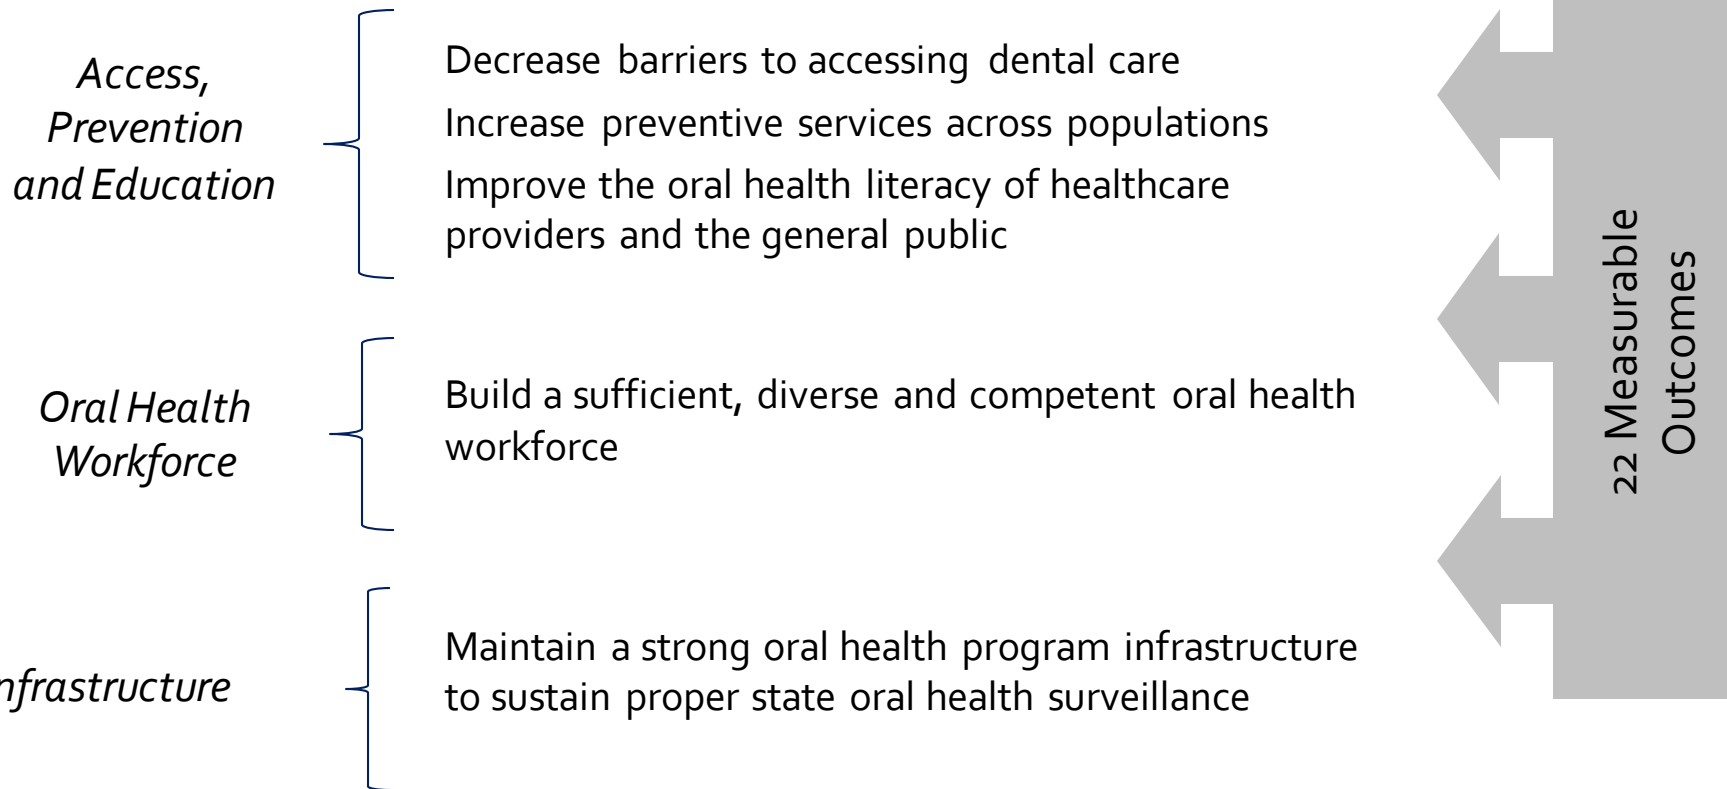

APRIL 21, 2022

Evaluation Overview

- The Plan contains 22 total measurable outcomes:
 - Access, Prevention & Education = 13
 - Workforce = 5
 - Infrastructure = 4
- SMART goals that align with the PA Oral Health Surveillance System

Evaluation Overview

OVERARCHING GOAL: Enhance the overall health of all Pennsylvanians through improved oral health.

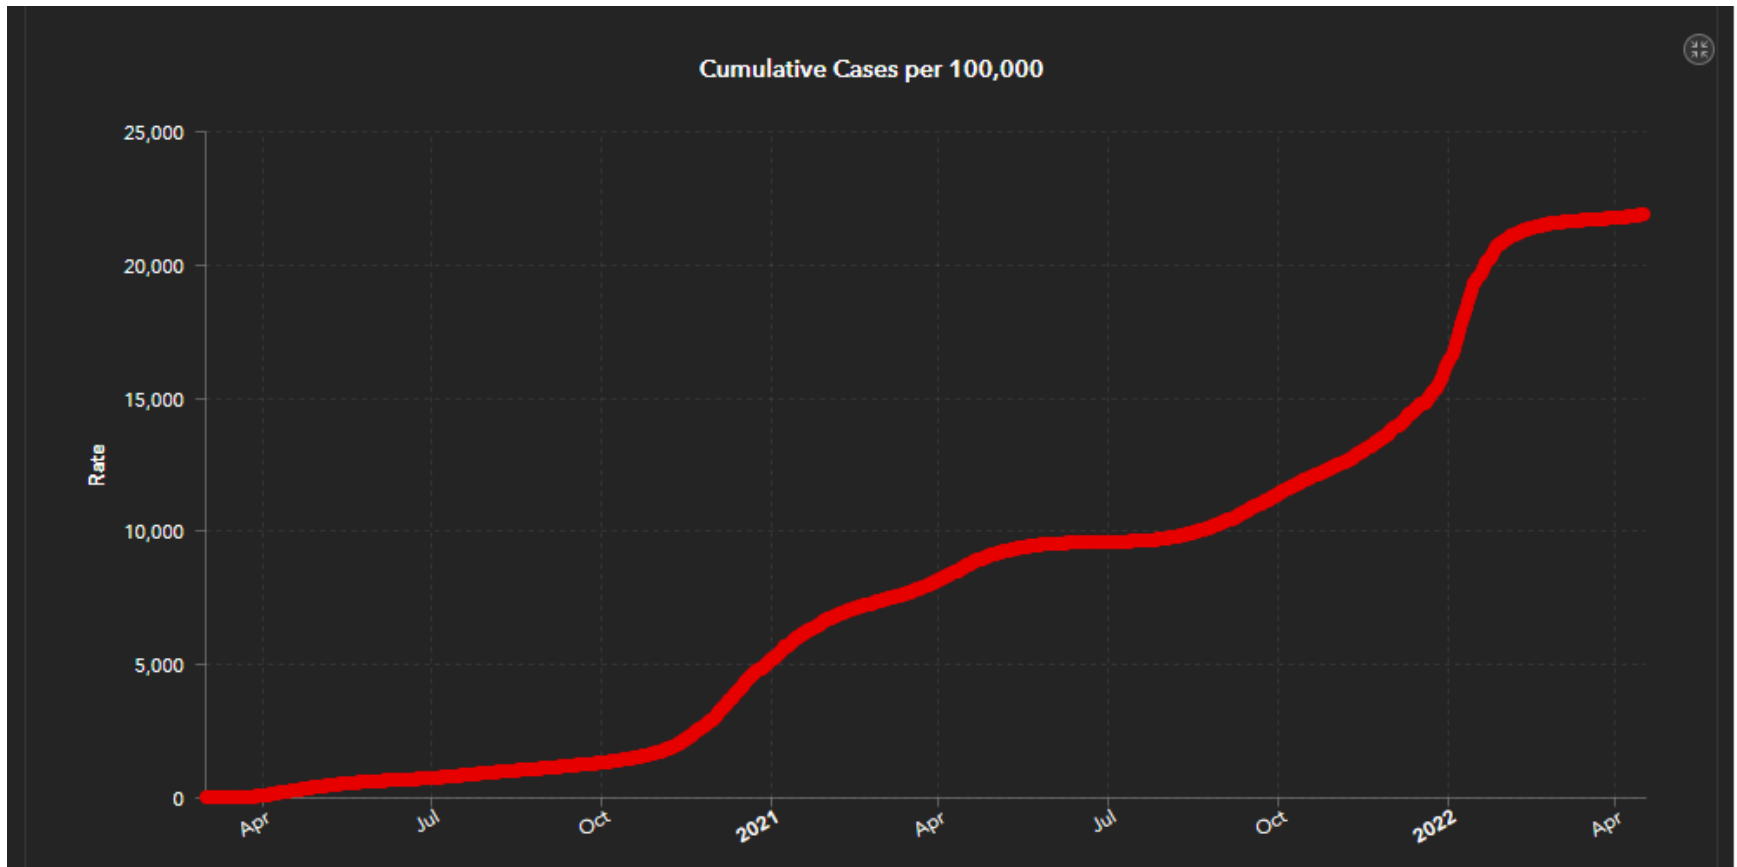

Y2 Priorities

- Priority A: Access Domain 1: Health Systems: *Increase the number of telemedicine programs that offer oral health services.*
- Priority A: Access Domain 2: Health Surveillance and Evaluation: *Collect appropriate data to track access, prevention and education needs across all age groups.*
- Priority B: Workforce Domain 1: Health Systems: *Explore new workforce models while fully utilizing the workforce currently working in PA.*
- Priority B: Workforce Domain 2: Health Surveillance and Evaluation: *Identify gaps in the oral health workforce and develop strategies to address them.*
- Priority C: Infrastructure Domain 1: Health Systems: *Recommend that the SOHP has the capability to effectively carry out the 10 Essential Dental Public Health services, including a surveillance system, consisting of an epidemiologist, sealant coordinator, CWF coordinator, and health educator.*

Data Tracking by Outcome

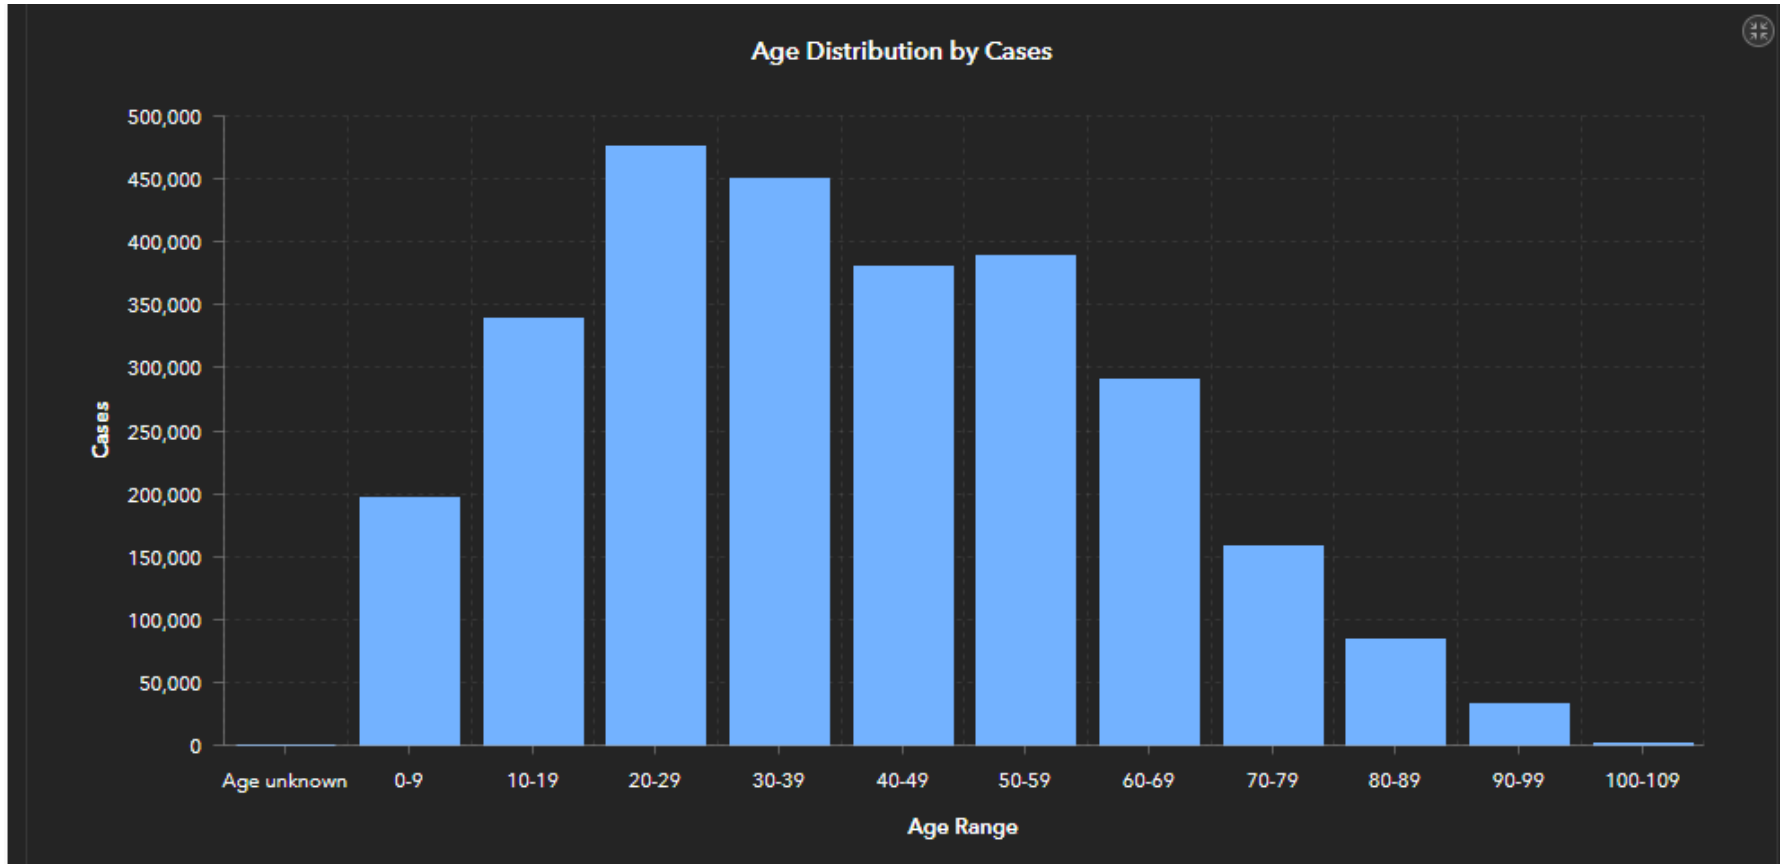

- No new updates since January 2022
 - Annual data from DHS to be provided in July
 - Baseline and status update include 2018, 2019, and 2020 data
- Impact of COVID-19 pandemic on OHP implementation and evaluation efforts
- Certified Community Health Worker Data

COVID in PA: Cumulative Cases

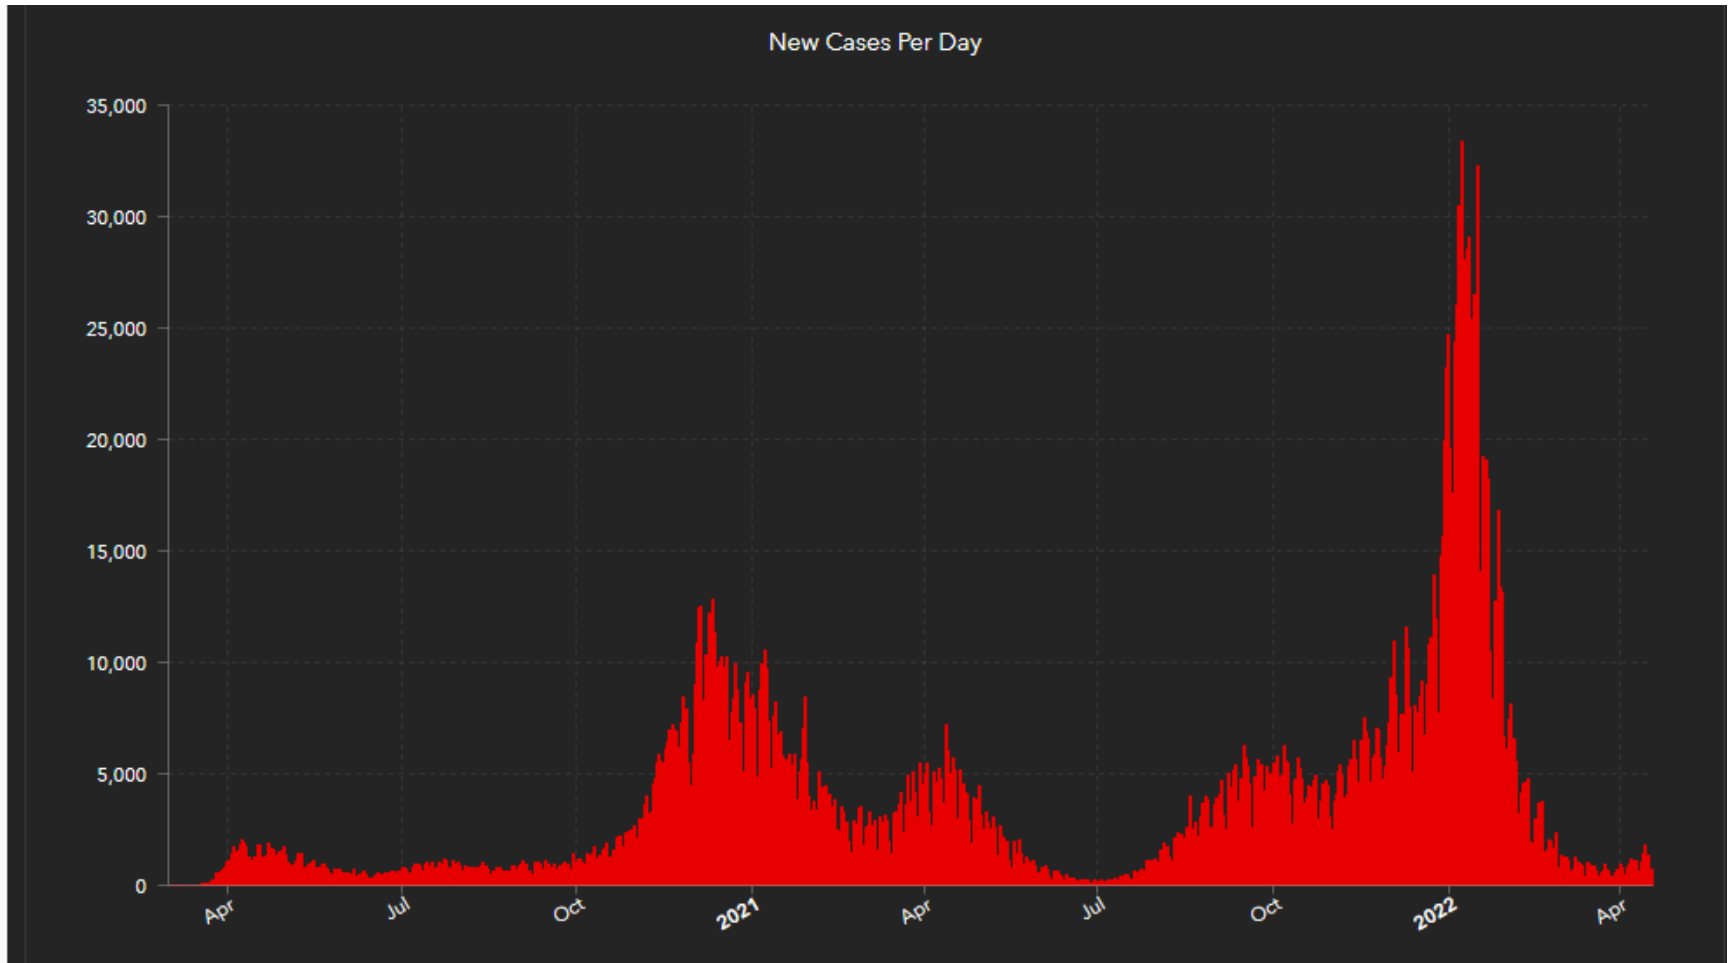

Data accessed 4.18.2022

COVID in PA: Age Distribution

Data accessed 4.18.2022

COVID in PA: New Cases Per Day

Data accessed 4.18.2022

COVID Impacts

- Impact of COVID-19 pandemic on preventive service data
 1. Preventive dental visits
 2. School-based sealant programs
 3. Number of medical providers applying TFV
- Need more time to see full impact
- May want to consider re-establishing baselines post-COVID
